

# DUDE, THINK SHE MIGHT BE PREGNANT?

THEN TELL HER DRINKING AND SMOKING WEED WILL MAKE LIFE SERIOUSLY HARD FOR THE BABY.

## THINK AHEAD.

Alcohol and marijuana affects the unborn baby's brain.  
This causes the child to have trouble concentrating, thinking and learning.  
If you think she might be pregnant, tell her to stop using now!

(The Children's Resource Network - 2003)

### EVEN A LITTLE GIVES A BABY BRAIN DAMAGE.

- For help to quit using
- Where to find pregnancy tests
- To get birth control and STD info
- For help to have a healthy baby
